Chinese proverb

The Artyzen Hospitality Group management team members believe that nurturing new talent and on-going staff development is a vital part of the Group's mission. It is a commitment that we make certainly to staff to ensure their career success within the Group, but also a pledge to our owners. As we have new brands cater for specific groups of "like-minded" people, we are looking for their-minded people who possess the energy and "heart for hospitality". The essential attributes required to be a part of our service team. And of course, it is also desirable if our Group values of being "Integrity, Collaboration and Right" are also values that fit well with your own personal outlook and way of doing things. Do you have an energetic personality that would allow you to really engage with our "mission-oriented" guests as part of your duties at Artyzen Hotels & Resorts? Benefits

- Promote general well-being
- General expansion and increase of energy and liveliness
- Increase core and skin temperature
- May help increase peristalsis and deeper respiration
- May help increase rate of tissue growth and repair in wound-healing
- Reportedly help increase energy field strength and immunity

How to Use

- Occasionally, you may place it over a specific injured area for extra energy or healing
- As a general rule, start with short sessions 10 minutes and build up to the longer times. Doing a couple of shorter sessions is better than one long session
- Use once or twice a day, not more than 20-30 mins each time
- The sensation of "enough" is when one feels a gentle laminating glow, warm body temperature, tingling or pulsation
- Do not use the blanket to sleep under at night because of the risk of overcharge
- Best use in clear sunny days, at higher altitudes, in lower humidity, during a full or new moon and when there are many sun spots
- The steel wool side should be placed on the body
- For the larger blanket, it should be placed over the front of the body from the base of the neck/throat as far down the legs as it will reach
- Best to lay the blanket flat over the body and not wrap it around

When to Use

- Low in physical energy/life-force energy (anorgonia)
- During stressful periods
- Onset of an illness
- After child birth
- After operation
- During shock
- Over wounds
- Weak immune system
- During emotional crisis

Precautions

- It should not be used as a substitute for proper medical or therapeutic treatment
- Do not use over prolonged period as this may cause an overcharge
- If you experience an overcharge (having stay too long under the blanket), you may feel pressure in the head, slight nausea, general ill feelings or dizziness. Get outside in the fresh air, breathe in some fresh air, or get under a shower of running water and sensation will dissipate. The primary purpose of the blanket is to increase the bioenergetics charge. Do not use when there is already an overcharge such as high blood pressure, heart disease, glaucoma, obesity, epilepsy, brain tumor, stroke, arteriosclerosis
- It is advisable to seek guidance of a therapist before first use
